WARNING: All plumbing installations must be done in accordance to legal regulations.

1. Read the complete instruction manual before beginning installation.
2. Confirm that your model will fit in intended location and plumbing fixtures are located where legally required before beginning installation.
3. Not all drawings on this manual are drawn to scale. Please refer to the model chart.
4. Walls and sub-floor must be solid, and square.
5. Always use drop cloth to protect bathtub from damage during installation.
6. Two people must be used at all times to move and install bathtub.

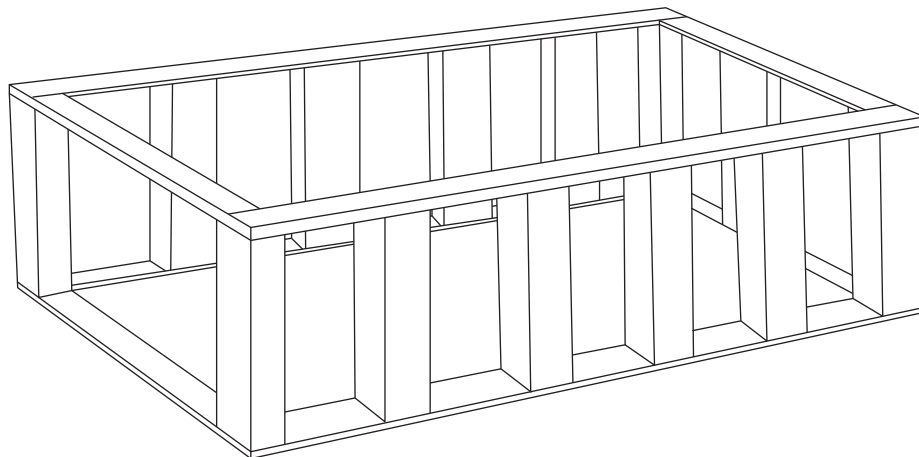

ATTENTION! Before installing the bathtub:

- **Verify all the necessary plumbing is installed by a certified plumber.**
- **Floor drain and trap are not included. Make sure to install according to local and legal regulations.**
- **This is only ONE installation method, please consult with professional prior to installation.**

1. Construct Frame

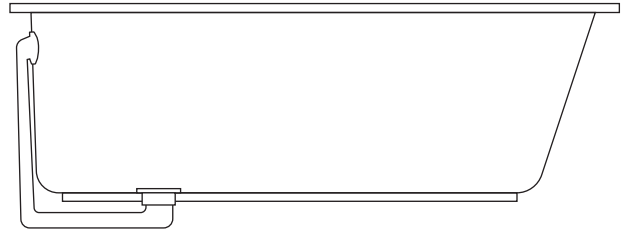

- Build framing, refer to model page for measurements for your tub.

2. Roughing-in Drain and Bathtub

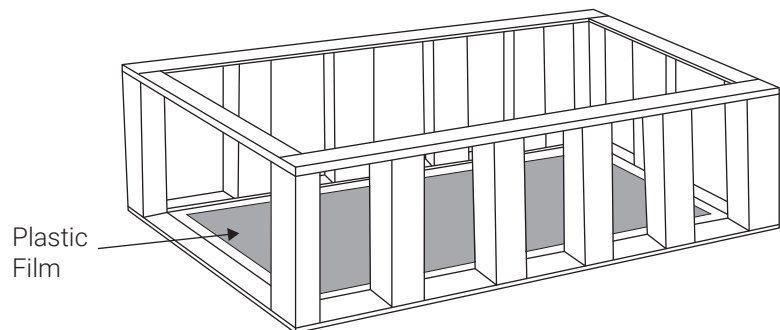

- Rough plumbing must be installed before bathtub installation.
- Floor drain and trap are not included. Make sure to install according to local and legal regulations.

NOTE: Do not connect the drain to the plumbing yet.

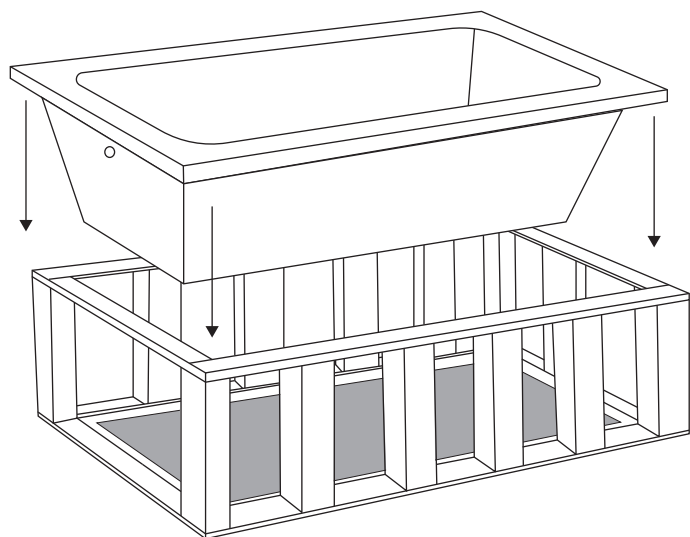

3. Lay Plastic Film *Optional

- Lay plastic film on subfloors to prevent water from being absorbed.

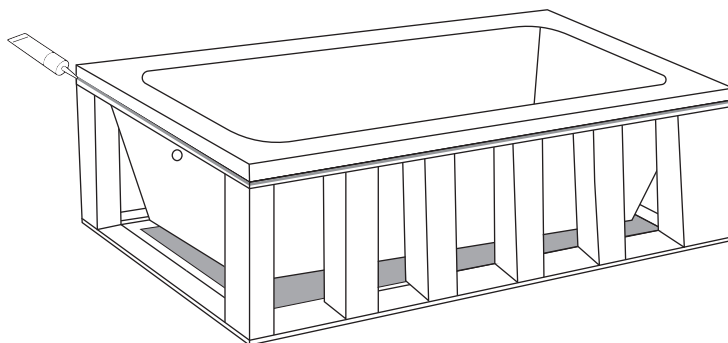

4. Drop Tub into Frame

- Carefully lift the bathtub into place.
- Ensure the tub is level.

5. Secure Tub into Place

- Apply a bead of adhesive/sealant on where the tub and frame meet.
- Apply a bead of adhesive/sealant on where the tub and frame meet.
- Wipe away any excess sealant with a damp cloth.

6. Connect Plumbing

- Finally connect plumbing and check for leaks.
